PROFILE

IT professional with 10 years of experience in system administration, server and network management, IT infrastructure, and modern web development. Skilled in Server, Database, back-end and front-end frameworks, with a proven track record of leading technical projects, mentoring teams, optimizing performance, securing systems, and delivering scalable solutions.

SKILLS

- Project Management & Team Leadership
- Public Relations & Stakeholder Engagement
- Critical Thinking, Analysis & Problem Solving
- Effective Communication
- Digital Marketing & Technology Integration
- Data Center Management & Virtualization
- Automation Technology & Process Optimization
- Training & Mentorship (Odoo ERP, Google Workspace, Siakad Cloud, LMS, BKD, Journal)
- Network Administration & Infrastructure (Mikrotik, Routing, Access Point, Wireless Solutions)
- IT Security Management (EDR, SIEM, UFW, IPTables, SSL, OWASP, ZAP, Database & Admin Security, Firewall, Blocking IP&Port)
- System Administration & Operating Systems (Linux, Windows, Server Environments)
- Programming & Development (PHP, JavaScript, TypeScript, Python, MySQL, PostgreSQL, API, SvelteKit, Tailwind CSS, Flutter, React Native, Laravel, CodeIgniter, WordPress, Wscript, Bash, Git, Perl, CSS, HTML)
- Web & Application Development & Deployment (Front-End & Back-End)
- System Applications (Next Cloud, Asana, Library Systems, Odoo ERP, Google Workspace, OJS3 Journal, Eprints Repository, NeoFeeder, OPAC, Sister, Webfig, POS Systems)
- Engineering & Technical Setup (Cabling, Topology, Hardware Planning)
- Troubleshooting & Technical Support (Hardware, Software, Networking, Devices)

WORK EXPERIENCE

Sahid Jaya Foundation

JAN 2025 - PRESENT

IT Infrastructure & Security

- Deployed the Ubiquiti ecosystem with mesh Wi-Fi, delivering seamless full-area coverage and eliminating manual network switching.
- Optimized hybrid cloud and on-premise infrastructure, balancing cost efficiency, scalability, and long-term readiness.
- Directed server and network management, including Apache, PHP, and database environments, focusing on performance tuning and security hardening.
- Developed and executed a comprehensive Disaster Recovery Plan (DRP), with automated backup workflows (shell scripting & cron jobs) to minimize recovery time and data loss.
- Designed and implemented IT infrastructure security measures, including firewall rules, IDS/IPS evaluations, endpoint protection, and SSL/TLS management with automated renewal (Certbot & Sectigo).
- Administered and optimized virtualization environments (Proxmox & VMware), leading smooth VM migrations to cloud infrastructure with minimal downtime.
- Conducted infrastructure and internal IT audits, identifying outdated systems, mapping vulnerabilities, and providing actionable recommendations for compliance and resilience.
- Standardized IT infrastructure across educational units through SOPs, knowledge bases, and internal staff training to ensure consistent operations and stronger security culture.
- Led infrastructure mapping initiatives, building detailed inventories of devices, applications, and networks while assigning responsible PICs for system ownership.
- Coordinated strategic IT projects, integrating internal applications and academic systems to support accreditation and operational requirements.
- Introduced IoT-based smart devices for offices and hotel rooms, enabling remote power management to achieve energy efficiency, with adaptation potential for educational units.
- Conducted cybersecurity awareness programs and developed practical guidelines to strengthen resilience among staff and educators.
- Laid the groundwork for future initiatives, including:
 - Central Monitoring System with real-time dashboards and alerts across units (networks, servers, devices).
 - Executive Monitoring Dashboard for directors with integrated live data.
 - Warehouse & Procurement System to regulate IT inventory and purchasing.

Sahid Jaya Foundation

DEC 2023 - JAN 2025

Software Architect

- Led the development and integration of internal systems, including:
 - Helpdesk Ticketing System
 - Digital Library System
 - Course Platform
 - WhatsApp Business Platform integration
- Led major improvements of the Siakad system, including:
 - Alumni Tracer
 - API integrations (internal & external)
 - Recognition of Prior Learning (RPL)
 - Adding comprehensive reporting modules to support academic and administrative needs.
 - Fixing data validity issues and ensuring consistency across subsystems.
 - Implementing MBKM (Merdeka Belajar Kampus Merdeka) features for compliance with national standards.
 - Optimizing query speed and pruning redundant processes to enhance performance.
 - Updating dashboards with real-time insights and adding new features to improve user experience.
- Documented legacy applications and developed modernization plans for long-term maintainability.
- Established and enforced coding standards, reviewing and analyzing IT programmers' output to ensure quality.
- Coordinated User Acceptance Testing (UAT) and overall QA processes to ensure software met business and compliance requirements.

WORK EXPERIENCE

- Administered and supported the HSK (Chinese Language Test) system as part of the foundation's international cooperation program, ensuring smooth operations, accurate data handling, and compliance with academic standards.
- Facilitated team knowledge-sharing sessions to upskill developers in new tools, frameworks, and best practices.
- Designed and delivered scalable software architectures, aligning technical roadmaps with business goals.

Surabaya University of Technology

MAR 2021 - OCT 2023

Supervisor IT Management

- Introduced system innovations on Linux, Windows Server, and cloud platforms, improving operational efficiency.
- Introduced and implemented the SEVIMA Siakad Cloud system, integrating academic management processes and enabling hybrid learning methods.
- Deployed the Ubiquiti ecosystem and redesigned the network architecture using Mikrotik as the main gateway with redundancy (main + backup), improving reliability and scalability.
- Expanded network infrastructure and IT devices in line with the growth of academic facilities and increasing student enrollment.
- Developed a Management and Strategy Planning Application to enhance productivity and support university accreditation requirements.
- Collaborated with the marketing consultant team to implement digital marketing strategies (Facebook Ads, WhatsApp Blast) and gather marketing databases to boost student recruitment.
- Designed and developed a Computer-Based Test (CBT) platform for scholarships, contributing to increased enrollment.
- Supervised and guided the IT team to provide consistent technical support for teaching and learning activities, ensuring minimal disruptions.
- Directed the design, development, and enhancement of IT infrastructure, including servers, networks, and security systems, ensuring scalability and resilience.
- Oversaw and validated system backups, patching, and security updates, strengthening data integrity and compliance.
- Coordinated the administration of academic systems and internal applications, ensuring high availability and user satisfaction.
- Created the official IT System Blueprint Document to fulfill accreditation needs and provide long-term IT governance planning, while reporting directly to leadership.

Surabaya University of Technology

AUG 2020 - MAR 2021

IT Management

- Introduced and administered Google Workspace for Education during the COVID-19 pandemic, enabling online teaching and learning continuity through virtual classrooms and collaboration tools.
- Managed the attendance system using fingerprint machines and provided exported reports to HR for payroll and compliance purposes.
- Created and managed corporate email accounts for lecturers, staff, and students, standardize mail delivery across the university for both internal and external purposes.
- Supports the creation of various types of online forms (Google Forms) for lecturers, university administration, and students to digitize workflows.
- Updated and maintained the university's web profile to strengthen marketing efforts and improve student enrollment.
- Provided hands-on IT support, troubleshooting, and maintenance for devices, networks, and academic systems.
- Managed the university's social media and online communication, creating content and interacting with audiences to improve visibility, support enrollment, and strengthen connections with students.
- Designed and implemented scheduled backup routines and patch management, reducing risks of system failure.

WORK EXPERIENCE

Bakso Tengkleng Mas Bambang

MAR 2019 - JUL 2020

IT Support Specialist

- Responsible for managing and maintaining the accuracy and integrity of data within the Enterprise Resource Planning (ERP) system.
- Oversight of ERP system integration and functionality across departments.
- Providing training and support for users on the ERP system to ensure proper use.
- Leadership in the development, maintenance, and security of the company's IT infrastructure, including network systems, servers, and data centers.
- Management of website and server operations, ensuring performance, security, and uptime.
- Handling procurement, troubleshooting, and maintenance of IT equipment to support business operations.

Bagus Laptop Computer Karanganyar

JUN 2017 - FEB 2019

IT Technician

- Provided comprehensive Laptop and PC repair services, from basic to advanced levels.
- Acted as a Distributor of IT spare parts, ensuring the supply chain for essential components.
- Delivered On-Site technical support for clients, addressing hardware and software issues.
- Managed Product supply and procurement for IT-related equipment.
- Specialized in Sales and Service for Laptops, Computers, Printers, CCTV systems, Fingerprint devices, Projectors, LCD screens, and Networking solutions.

INTERNSHIP

Telkom Indonesia Tbk. Karanganyar

OCT 2016 - DES 2016

Junior Network Technician

- Assisted in the installation and configuration of network infrastructure, including fiber optic and copper-based systems for telephone and internet services.
- Performed network maintenance and troubleshooting, ensuring optimal connectivity and uptime for residential and business clients.
- Supported MikroTik router setup, IP address configuration, and local network optimization.
- Helped in the deployment of IPTV services, including setup and signal testing.
- Conducted routine inspections of central and client-side equipment to maintain service quality.
- Collaborated with senior technicians to resolve complex network issues and provide efficient solutions on-site.
